

## Surrogacy

**Surrogacy** is a process in which the surrogate mother is inseminated with the sperm of the intended/natural father. She is genetically related to the child which she carries for the intended parent/s.

### Requirements

You must have given birth to at least one child and be:

- Between the ages of 21 and 35
- In good general health, disease-free, and willing to test accordingly
- A non-smoker
- Mature and responsible
- Committed to the surrogacy process
